PROFESSIONAL EXPERIENCE

Wtvision Solutions Pvt. Ltd, Intern

11/2025 – Present | Noida, India

1. Talos Helm & Talos Relay (Desktop + Distributed System)

- Built a **cross-platform desktop application** using PySide6 with Material UI and Qt Widgets.
- Developed *Talos Helm*, a master application capable of:
 - Pulling container images from **AWS ECR**
 - Running containers via Docker Desktop
 - Managing full container lifecycle (start, stop, update, delete)
- Implemented **environment variable management** for containers, enabling dynamic configuration of static images.
- Built *Talos Relay*, a distributed agent system enabling **remote container management across multiple machines**.
- Designed a **centralized control → distributed execution architecture**, where one Helm instance can control multiple Relay nodes.
- Implemented backend using **FastAPI** with multiple **WebSocket connections** for real-time communication and live updates.
- Enabled **remote operations** (start, stop, update, delete, environment changes) across systems.
- Implemented **offline command queuing**, ensuring commands are executed automatically when a disconnected system comes back online.
- Used **AWS RDS** as the database and deployed backend services on **AWS Lightsail** for scalable and reliable infrastructure.

2. Match Reports (Next.js Full-Stack Application)

- Developed a **badge management system** in **Next.js** with integrated **REST APIs** for cross-platform workflows with Incentiwise.
- Optimized performance by improving **database queries** and reducing load times.
- Worked with **Supabase PostgreSQL database** and implemented **Row-Level Security (RLS)** for role-based access control.
- Built a **Debrief Report System** with approval workflows and **PDF export** for client-ready reports.

3. Incentiwise (Performance Optimization & API Enhancements)

- Optimized **API integrations and data fetching**, improving performance and reducing latency.
- Enhanced **cross-project integration** with Match Reports for badge and appreciation workflows.

Ns Corporation India, Intern

05/2025 – 10/2025 | Noida, India

- Developed a **Bank Account Management System** using **Python**, **MySQL**, implementing **account management, transaction processing (deposit/withdrawal), and relational database design**.
- Ensured **data integrity, input validation, and secure transaction handling**, with optimized **query execution** and development in **VS Code**.

Swarnim Infosoft PVT.LTD., Intern, Intern

11/2024 – 04/2025 | Noida, India

- Simulated the **Go-Back-N ARQ protocol** in **Java**, implementing **sender-receiver architecture, sliding window mechanism, cumulative acknowledgements, and timeout-based retransmissions** for reliable data transmission.
- Incorporated **error detection/handling, packet loss simulation, and performance metrics tracking** (throughput, retransmissions) using **IntelliJ IDEA**.

PROJECTS

Resume Analyzer [🔗](#), AI Powered Resume Optimizer

05/2026 – 06/2026

Developed an **AI-powered Resume Analyzer platform** for ATS-style resume evaluation, skill extraction, and job compatibility analysis using **Python, FastAPI, React, Next.js**, and **Gemini AI**. Implemented secure authentication, resume parsing, AI analysis pipelines, caching, rate-limit handling, and persistent analysis history with **Supabase (PostgreSQL)**. Built scalable **backend APIs** and optimized AI request workflows for **efficient full-stack performance**.

Smart Helmet With Voice Assistant, Collision Warning System

06/2024 – 10/2024

- Developed a **Smart Helmet with Voice Assistant** for **collision detection and prevention**, integrating a **speech-based alert system** using **Python** and **deep learning models (YOLOR)**. Trained and deployed the model on **AWS SageMaker** using the **Nulimages dataset** via **Jupyter Notebook**, enabling real-time object detection. Integrated hardware components using **Raspberry Pi (camera, microphone, speaker)** for end-to-end **edge + cloud-based intelligent system**.

Real-time message transmission system, Chat Server

12/2023 – 05/2024

- Developed a **real-time messaging system** in **Java** enabling **authenticated one-on-one communication** with efficient **client-server architecture**. Implemented **ServerSocket/Socket programming, bidirectional data streams**, and dynamic client handling using **ArrayList** (supporting up to 100 concurrent users). Built an interactive **GUI** and integrated **Java Servlets** for session handling and communication logic, developed using **IntelliJ IDEA**.

SKILLS

Language: Python | Typescript | Javascript | Sql | Java

Frontend: Next.js | React | PySide6, Qt widgets | Material UI

Backend: FastAPI | Rest APIs | WebSockets

Databases: PostgreSQL (Supabase, AWS RDS) | MySQL | MongoDB

Cloud & Devops: Docker | AWS (ECR, RDS, Lightsail, Sagemaker)

Tools & Technologies: Git | VS code | IntelliJ IDEA

EDUCATION

Bachelor of Technology, Computer Science Engineering,

Amity University

07/2019 – 05/2022 | Noida, India

Diploma, Computer Engineering, PDM University

07/2016 – 05/2019 | Bahadurgarh, Haryana

BADGES & CERTIFICATES

AWS Educate Machine Learning Foundations. — [Link](#) [🔗](#)

Verified Certificate Of Generative AI with AWS — [Link](#) [🔗](#)
